

fork returns:

- 0 in the child
- child PID in the parent

```
while(1) // fork Bomb
{
    fork();
}
```

```
while(1) {
    get request
    process request
    send back response
}
```

⇒

```
while(1) {
    get req.
    if (fork() == 0) {
        process req
        send response
        exit(0);
    }
}
```
